

CHLOE CHALK

Graduate Environmental Scientist

Chloe is a Graduate Environmental Scientist who commenced her consultancy career in 2018. Having graduated with a Bachelor's degree from Bond University in 2015, Chloe went on to complete her Master of Environmental Management, majoring in Conservation and Natural Resource Management at The University of Queensland in 2018. Since joining Epic in May 2018, Chloe has worked on various team projects and has gained experience in the preparation of environmental management plans, Environmental Impact Statements (EIS), Environmental Authorities (EA), proposals, Due Diligence reports and process documents, as well as assisting Erosion and Sediment Control Officers to carry out investigations related to contraventions of environmental and planning legislation. Chloe is also able to undertake a range of tasks including writing, editing, analysing and researching to provide high quality document preparation.

EXPERIENCE

ENVIRONMENTAL MANAGEMENT AND PLANNING

- **Author, Multicom Resources Saint Elmo Vanadium Project EIS, Julia Creek, Queensland.** Chloe has written several chapters in the EIS for the upcoming Vanadium Pentoxide (V2O5) mine in Queensland. She was also responsible for the project scheduling.
- **Team Member, Carpentaria Gold EA Amendment, Ravenswood Gold Mine, Queensland.** Chloe assisted with the preparation of the Environmental Authority (EA) Amendment Summary Report for the Ravenswood Gold Mine, Queensland.
- **Team Member/Field Assistant, EA, Range Gas Project, Queensland.** Chloe assisted with the baseline vegetation assessments, including secondary, tertiary, quaternary level and BioCondition sampling procedures. Chloe also assisted with the reporting component.
- **Team Member/Field Assistant, Gracevale Ecological Assessment, Indigenous Land Council, Aramac Queensland.** Chloe undertook the initial desktop assessment and assisted with BioCondition, forest potential and water sources condition assessments in the field. Chloe then prepared the results and recommendations from the field assessment for the final report.
- **Project Support, Cleanaway Landfill Dust Monitoring, Willawong.** Chloe is currently responsible for carrying out the monthly dust monitoring field works at the Cleanaway Landfill Facility in Willawong. She also assists with preparing the monthly analysis report for the Client.
- **Work Experience Team Member, Brisbane City Council.** Assisted in carrying out investigations regarding contraventions of environmental and planning legislation related to ESC. This included allocating complaints and prestart meetings to relevant Officers by undertaking desktop assessments; ensuring industry best practice ESC measures are implemented on construction sites; and assisting Officers with site inspections to collect evidence for breaches of legislation. Also assisted the Pest Plant Team carry out initial inspections and follow-up inspections for properties with existing pest plant management plans.
- **Industrial Placement Team Member, Queensland Parks and Wildlife Service.** Assisted with the development of an Executive Leadership Team Briefing note to gain approval for amendments to the scope of the 2018 Queensland State of the Parks Report; tested the interim park management database and provided recommendations for QPWS moving forward; assisted with the preparation of management plans for Tewantin and Noosa National Parks; and compiling a research nomination for "Visitor Experience and Satisfaction" in Queensland National Parks.
- **Work Experience Team Member, Tweed Shire Council.** Undertook desktop research and assisted with workshops to provide Councillors with an up-to-date picture of how climate change mitigation and adaptation is considered in over 25 Council program areas.

CONTAMINATED LAND

- **Due Diligence Reports, various projects.** Chloe has prepared Due Diligence reports for several projects across Queensland.
