SHAILLE HILL

Environmental Consultant

Shaille is an Environmental Consultant with over 2 years' experience in Environmental Impact Assessments and Approvals. Shaille has developed experience in undertaking multi-disciplinary environmental and planning assessments and coordinating delivery of a large-scale environmental impact statement. Shaille has developed skills in undertaking a range of desktop and mapping investigations, undertaking high-level data reviews, identifying and interpreting environmental constraints and legislative triggers for proposed development, and liaising with internal and external clients. This work has provided her with a sound knowledge of local, state, and commonwealth legislation, statutory approvals, and undertaking environmental impact assessments.

QUALIFICATIONS

2019 Griffith University / Bachelor of Environmental Management, major: Sustainability

MAJOR PROJECTS

- CopperString 2.0 EIS Environmental Impact Statement
- Storm King Dam Raise Project – Toowoomba Regional Council
- Mount Morgan EA Amendment – Heritage Minerals
- Confidential Wind Farm Project- Confidential Client
- Archerfield Wetlands Management Track - Brisbane Sustainability Agency Pty Ltd
- Intersection Upgrade Project – Department of Transport and Main Road (TMR)

AFFILIATIONS

- Member, Environment Institute of Australia and New Zealand

EXPERIENCE

STATUTORY PLANNING AND APPROVALS

- **Environmental Consultant, Storm King Dam Raise Project, DRDMW, Warwick, Queensland.** This project required preliminary design of a raw water pipeline proposed raising of the existing dam. Shaille was responsible for investigating the two pipeline routes and the proposed dam inundation area, incorporating assessment of environmental values, constraints, and environment and planning/approval obligations potentially associated with the development. Shaille also undertook an assessment of land acquisition requirements of the pipeline and dam and provided recommendations to the land valuers.
- **Environmental Consultant, Heritage Minerals EA Amendment Application, Mount Morgan, Queensland.** Shaille was engaged to produce a supporting information report for a minor EA Amendment Application for the client for ongoing rehabilitation and mining works. Shaille worked closely with resources in Townsville to develop the report, undertake a literature review of existing approvals and documentation for the project area and coordinate overlay mapping outlining environmental constraints within the proposed operational areas.
- **Environmental Consultant, Stage 2 Development Approvals, Coppabella, Queensland.** This project involved a revised assessment of the proposed expansion to workers' accommodation. Shaille was involved in preparing the Development Approval for the material change of use application, undertaking existing environment desktop searches, and identifying and reviewing applicable planning schemes and state codes relevant to the assessment.
- **Environmental Consultant, Archerfield Wetlands Management Track, Brisbane, Queensland.** This project involved the construction of a proposed shared use path through Archerfield Wetlands as part of the Oxley Creek Transformation Mater Plan. Shaille assisted in preparing a planning report supporting an development approval application for operational works for tidal works, works within a coastal management district, removal, destruction or damage of marine plants, and constructing or raising waterway barrier works.
- **Environmental Resource, Conoco Phillips, Brisbane, Queensland.** Shaille was engaged to prepare an environmental incident reporting action plan, develop a strategic framework for sustainable development, and undertake an audit review of the client's risk register.

ENVIRONMENTAL IMPACT ASSESSMENT

- **Coordinator, CopperString 2.0 Transmission Line Environmental Impact Statement (EIS), Central Queensland.** Shaille's role on this Project involved regular communication with the client, sub-consultants, technical reviewers, and technical leads across North Queensland and Australia. Throughout the Project, Shaille maintained a project actions and deliverables register, assisted technical leads conduct gap analyses, assisted in preparing a Regulatory Approvals Plan and undertook a thorough review of the project's terms of reference for the client. Shaille also assisted in writing the Field Development Plan, Project Description and responding to agency submissions.
- **Environmental Consultant, Toowoomba Regional Council Dam Flood Capacity Upgrades Project, Toowoomba, Queensland.** Shaille undertook baseline environmental desktop searches for the two dam areas and assisted in preparing the Review of Environmental Factors Report.
- **Environmental Consultant, North Queensland Water Infrastructure Authority Concept Plan, Central Queensland.** As part of the concept phase of the Western Queensland Irrigation and Agricultural Scheme project, Shaille undertook a high-level review of environmental and heritage constraints and legislative triggers for future proposed works.
- **Environmental Consultant, TMR Intersection Upgrade Project, Brisbane, Queensland.** Shaille assisted in preparing an environmental design report and ecological investigation report for the proposed intersection upgrade. Shaille undertook an on-site noise barrier assessment and attended an on-site ecological assessment involving counts of non-juvenile koala habitat trees, habitat assessment, and identification of threatened species.
- **Environmental Consultant, Wind Farm Project, Darling Downs Region, Queensland.** Shaille assisted preparing the site constraints assessment and Matters of National Environmental Significance reports for the project areas by referring to baseline environmental desktop searches, findings from fieldwork and relevant state and commonwealth legislation. Shaille also assisted in preparing the referral under the *Environment Protection and Biodiversity Conservation Act 1999*.
- **Team Member, Transgrid Tower Sampling, Yass, New South Wales.** Shaille worked with resources in Newcastle to undertake surveying of remnant paint on transmission towers around Jindabyne, Kosciusko National Park, Yass, and in the Australian Capital Territory. This involved an assessment of paint features and collecting a sample of the paint for lab testing.
